

Webinar: An Overview on Codex Methods of Sampling and Analysis
28th March 2019: 1130- 1300 hrs

With the growing innovations in the food sector, robust sampling and Analysis plan is critical to monitor the compositional and quality aspect of foods w.r.t contaminants, adulteration and product consistency. The regulatory ecosystem is also evolving for sampling and analysis and it is pertinent to keep pace with the new developments to ensure effective compliance, right from the procurement of raw material to the finished products.

In this context we are pleased to announce that **CII Food & Agriculture Centre of Excellence is convening a series of Webinars on Food Sampling and Analysis**. The aim is to understand the existing regulatory requirements and global practices such as CODEX in this area.

This series would focus on the technical approach for sampling and analysis w.r.t consistent representative sample drawing, reliable analytical details, identification of potential sources of variation and application of good practices to minimize such variations.

Webinar aims to:

- Upgrade knowledge and skills of Food Sector Professionals involved in sampling and analysis especially for MSMEs and SMEs sector.
- Overview of the global sampling and testing systems.
- Develop understanding on sampling and analysis protocols for import and export.

The first in the series, of these webinars is on **An Overview on Codex Methods of Sampling and Analysis on 28th March 2019 from 1130 hrs**

Keynote Speaker –

Dr Attila Nagy
Chairperson
Codex Committee on Methods of Analysis and Sampling

Who should attend:
