

## CII-FACE e- Learning Certificate Course on VACCP, TACCP and Mitigation Techniques for Food Fraud, Food Defense & Food Safety

4 Comprehensive Modules in February 2020

**23<sup>rd</sup> February**

Module 1 | Module 2  
1100-1230HRS | 1500-1630HRS

**26<sup>th</sup> February**

Module 3 | Module 4  
1100-1230HRS | 1500-1630HRS

### ABOUT THE TRAINING

Requirements for food fraud and food defense have been articulated in various Standards, such as FSMA, BRC and FSSC22000 version 4. Both these topics deal with intentional adulteration, designed to either yield economic gains for the criminal or to cause harm to the consumer, contrary to HACCP, which is designed to control unintentional or accidental harm. Dealing with intentional adulteration is no easy task for those in the food industry. The challenges are enormous. To strengthen food defense within your organization, CII-FACE is organizing an E- learning **training course to develop practical skills and confidence to implement Vulnerability Assessment Critical Control Point (VACCP) and Threat Assessment Critical Control Point (TACCP).**

#### TRAINING MODULES

1. Introduction to Food fraud & food defence

2. Vulnerability assessment

3. Threat Scoping

4. Mitigation tools and techniques

#### WHO SHOULD ATTEND ?

- Staff tasked with the development & maintenance of Food Safety Management System.
