

National Post – Harvest & Logistics Summit

30th November 2022, Mumbai

About the Summit

Climate change is one of the most prominent issues faced by the world today. Carbon dioxide, the heat-trapping greenhouse gas is the main driver of global warming. One needs to think geographically such that the issues because of climate change are addressed at a global level.

Changing weather patterns, a increase in forest fires, floods, and cyclones are prominent issues impacting agriculture and causing severe economic loss. The collaborative role of industry and government in taking up best practices to mitigate the vagaries of weather and ensure a sustainable and stable climate with a minimal carbon footprint on the environment.

In line with the honorable Prime Minister's vision of Achieving Net Zero by 2070, policies to initiate a transition to clean renewable energy will be critical in boosting the annual GDP and creating more jobs as there will be less dependency on fossil fuels.

To understand and develop a roadmap for sustainable development, the Confederation of Indian Industry (CII) is organizing National Post-Harvest & Logistics Summit on 23rd November 2022 at Hotel Trident, Nariman Point in Mumbai.

Beneficial for
